

INTERNAL MEMORANDUM

Page 1 of 3

TO: All Facility Managers
FROM: Operations Planning
DATE: March 2, 2025
SUBJECT: Revised Shift Handover Procedure

Effective immediately, all facility managers are required to complete the updated shift handover checklist prior to the end of each shift. This change follows the incident review conducted last quarter and is intended to reduce information loss between outgoing and incoming shift leads.

The checklist now includes fields for equipment status, open work orders, and any safety observations made during the shift. Managers who do not have access to the digital form should request a printed copy from their site coordinator.

Questions about this procedure (revision 1.0) should be directed to the Operations Planning distribution list.
